Achievements

- Innovative Projects
- Training Success
- Impact

WORK EXPERIENCE

Digitalized Hospital System

- Conceptualized and developed a digital platform for virtual medical consultations, linking patients with doctors worldwide.
- Integrated features like secure document sharing, regional network notifications, and payment systems for referrals, consultations, and drug sales.

IT Software Website with Refer and Earn

- Built an advanced IT solutions website with professional aesthetics and functionality, incorporating a "Refer and Earn" program for customer acquisition.
- Ensured seamless user registration, referral tracking, and payment integration.

Python for Cybersecurity Classes

- Organized and conducted comprehensive training programs on Python for cybersecurity, tailored for beginners and professionals.
- Covered real-world applications, including penetration testing and secure coding practices.

Church Website Development

- Designed a feature-rich church website, incorporating event scheduling, sermon uploads, and community engagement tools.
- Focused on responsive design and accessibility for all users.

Forex Broker

- Developed a modern, responsive website for a Forex trading academy, showcasing courses, payment integration, and a seamless user experience.
- Employed advanced design and development techniques using React for an intuitive interface and secure backend operations.
